

# Quick-Start Set-Up Guide – InnoMedia ATA

## EQUIPMENT

Connecting your HughesNet® Voice equipment is simple and involves the following:

- Analog Telephone Adapter (ATA)
- Power cable with two-prong adapter
- E911 Service WARNING Sticker
- Yellow Ethernet cable
- Phone cord
- Your phone
- Your HughesNet satellite modem
- Your computer or wireless router
- Your existing Ethernet cable—Connects your HughesNet modem to your computer or wireless router

## ATA Port Labels

**1**

## SET UP

The steps below feature an HT1100 modem, but the steps are the same for an HN9000 model.

This guide requires the SAN and MAC Address of your ATA. The SAN can be found at the top of the homepage of the System Control Center. The MAC Address can be found on the label on the side of the ATA box.

1. Locate your HughesNet satellite modem. For easy identification, the front of the unit has five blue LEDs. A cable connects the modem to your PC or wireless router. Make sure that you can access the Internet through your browser.

2. The ATA will be connected between the HughesNet modem and your computer or router by the following steps.
3. Disconnect your Ethernet cable from your computer or wireless router and connect it to the yellow WAN port on the ATA.

**2**

4. Connect supplied yellow Ethernet cable from the green LAN port on the ATA to Ethernet port on your computer or wireless router.

5. Connect phone (using supplied cord) to PHONE 1 port on the ATA  
NOTE: Do not connect anything to PHONE 2 port.

6. Confirm that your HughesNet satellite modem is powered up. Connect power cable to DC 5V jack on the ATA.

**3**

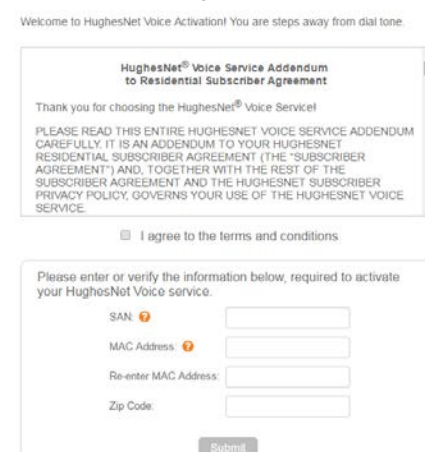

7. Plug the power supply of your ATA into your electrical outlet. The POWER LED should be solid green. The RUN LED should be blinking red. The WAN and LAN LEDs should be solid amber. See image below.

8. Test your connection to the Internet by browsing to a favorite Web page. Your connections are now complete.

## ACTIVATION

9. Visit our Activation Web site at <http://voice.hughesnet.com/>
10. You will be presented with the following screen.

Review the Terms & Conditions and click on the box to indicate that you agree. Next, enter the SAN, MAC Address of your ATA, and Zip Code at your Installation Address. Click on Submit, and follow the instructions to complete your activation.

**4**

11. You will be presented with the following screen. Verification can take up to 15 minutes, depending on quality of your connection.

**HughesNet | Voice**

**Verifying Service**

Your HughesNet Voice service is moments from being activated. We appreciate your patience while your ATA is configured and downloads the latest software to ensure the best HughesNet Voice customer experience. This process may take some time.

Once your service is activated a "Finish" web page will display with your new phone number and Caller ID. The PHONE 1 light on your ATA will also be solid green.

This number will be permanent if you choose or temporary if you wish to transfer a current phone number to your new HughesNet Voice Service. Keep in mind that transferring can take a few days.

Once activation is complete you will have dial tone and can make and receive calls. Following activation, access Web Self-care to:

- Set up your HughesNet Voice management account
- Set up and listen to your voicemail
- Transfer an existing telephone number to your new HughesNet Voice service
- Manage your account settings, preferences and other features

12. Once service is verified, you will then be presented with the following page. You will see the phone number and Caller ID assigned to you on completion. Make a note of it.

**HughesNet | Voice**

**Finish**

Congratulations! Your HughesNet Voice activation is complete! You should now have dial tone and the ability to make and receive calls.

Your new number is: **5558675309**

Your caller ID will display as: **Thomas Heath**

To manage your account settings, preferences and access other HughesNet Voice features, please register with HughesNet Support Center and select "Manage"

Return to Web Self-care at any time from the HughesNet Support Center.

You may wish to print this page to retain your new number.

Thank you for choosing HughesNet Voice!

13. After successful activation, the POWER, RUN, PHONE 1, and VOIP LED lights should be solid green. The WAN and LAN LED lights should be a flickering amber color. Click on the "Manage" link at the bottom of the page to go to the Support Center to register for Web Self Care.
14. If you are new to the Support Center, you will need to register using an existing email account such as Yahoo, Google, Windows Live, or AOL, or your existing HughesNet email account if you have one. Or you can create a new Hughes.net email account and sign up using that email address.
